

# CONTINUOUS DELIVERY PLATFORM FOR DEVOPS

**Accelerate Application Release Cycle Through Cloud**

To survive and succeed in an uncertain economic environment, business models and processes must be agile and flexible. The IT organization must align itself to business priorities and adopt some bold changes to deliver business value. Today, the application development life cycle is often bottle-necked by environment availability issues:

- It takes too long to get a new environment provisioned
- Environment build processes are erroneous
- Large release management teams are required to support various projects

## Wipro's Continuous Delivery Platform for DevOps

Limited availability of environments and dependence on legacy systems drastically reduces the number of projects that can run simultaneously in your enterprise. DevOps on Cloud infuses agility and speed into IT, enabling you to react faster to your business needs, accelerate your project timelines and quickly respond to change and continuous development. Wipro's Continuous Delivery Platform orchestrates the on-demand provisioning of environments on different types of infrastructures like public cloud, private cloud or hybrid infrastructure for DevOps.

*DevOps enables the IT organization to break out of silos, embrace collaboration, and inject that elixir of agility to drive business success.*

*The on-demand provisioning of environments within this infrastructure, with all the software and application deployed and configured on it, is the key enabler for DevOps.*

## Key features

- **Self-service portal** for provisioning and managing multiple test environments
- **Rapid Deployment packs** for complex enterprise applications
- **Customized reporting** and charge back mechanisms
- **Supports multi-cloud environments** – private, public or hybrid
- **End-to-end automation** triggered through a single click

## With Wipro's Continuous Delivery Platform, you can achieve

- **Seamless integration** with application development, testing and management tools
- **Enhanced collaboration** between internal teams
- **Faster time-to-market** through automation and shorter release cycles
- **Lower project costs** through innovative cloud-based pricing models

## Success Story

### Wipro saved 65% costs for a leading UK-based publishing & information provider with the Continuous Delivery Platform for DevOps.

A leading UK-based publishing and information provider operating in the science, medical, legal, risk & business sector, selected Wipro for their application transformation on public cloud (AWS). Wipro's **Continuous Delivery Platform for DevOps** enabled the client deploy environments across the application life cycle, in an on-demand basis, **reducing both project costs and time savings up to 65%**.
